About Me

I am a third-year undergraduate at the University of Colombo School of Computing who is always enthusiastic to learn and undertake new challenges. I am a self-motivated, responsible person who works hard and adaptable to all challenging situations. As a flexible, good negotiator, I am interested in web and mobile application development and look forward to being a collaborative team worker who is effective in time management.

Projects

TravelMate- A mobile application for travel management | Ongoing| 3rd year group project

TravelMate is a mobile application designed native to Sri Lanka to transform the way people plan, organize, and enjoy their travel experiences. Through our app users can easily plan their trips by selecting their desired destination, travel dates and plan and manage the budget as well.

Technologies: Flutter, Node JS, PostgreSQL, AWS
GitHub | [Repository](#)

Colegio - Online education platform | 2nd year group project

Colegio is an online education platform aimed at Sri Lankan students and teachers. Even upcoming newly inspired Sri Lankans who wish to become a teacher or course provider can join Colegio and post content to reach an audience.
